

Digital Services

Software & Industrial

IOT

By Kiran Desai

B.E.,M.S.(Industrial Engg.,USA)

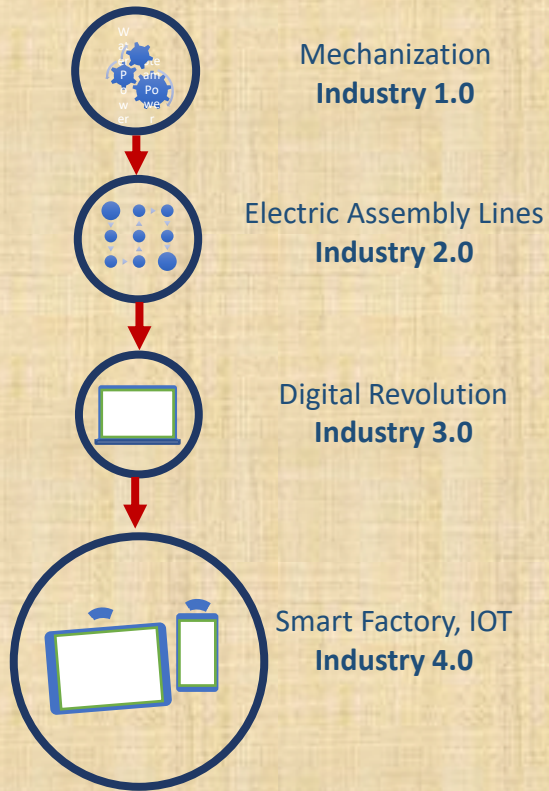

About Us

- We focus on Digital Services.
- Software Solutions for Manufacturing Companies.
- Industrial IOT (Internet of Things) Solutions.
- Software development services for E-commerce Marketplace.
- Our solutions are Cloud-based and designed for Web, Mobiles and Tablets.
- Management has 30+ years experience in Manufacturing

Manufacturing Solutions

- **Production Management** with Bill of Materials, Manufacturing Work Orders, Production Scheduling, Total Inventory Tracking with Barcode & RFID integration and Product Costing.
- **Quality Control** records and data analytics.
- **Computerized Asset & Maintenance Management System (CMMS)** Industrial Asset Records with maintenance work orders, spare parts management and safety procedures.
- **Industrial IOT** solutions for Monitoring Factories.

Industrial IOT Solutions

- Industry 4.0 is our prime goal for Manufacturing Companies - **Go Digital.**
- Increase productivity by **Increased Yield** and **Minimum Downtime.**
- Provide right tools in the hands of manufacturers.
- Application specific sensors record important data.
- Use Predictive Analytics to determine possible machine malfunction and send alerts.
